Innovation Scholarship and Career Showcase

Innovation is the driving force behind industry growth. Are you ready to join and excel in the innovation workforce?

Join us for an exclusive Virtual Career Meet & Greet where you are eligible to receive scholarships and direct connections for internships and early career positions with top companies in the Biomedical Industry. At this event you can elevate your career, connect with industry leaders, and showcase your hands-on innovation skills!

What is an Innovation Career Meet & Greet?

Our Talent Meet & Greets combine the best aspects of virtual career fairs while eliminating their common challenges. Unlike traditional open career fairs where students have difficulty aligning with direct requirements for typical open positions, our approach is designed to give you direct access to the most promising employers who are seeking your specific talents!

Unlike other career fair type opportunities, our Meet & Greets are limited to 30 students and 20 industry members—all focused on the topic of the event. No waste of time roaming between recruiters and hoping you are a fit.

Why Attend the Career Meet & Greet?

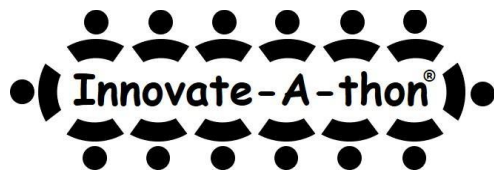

- Network with industry professionals looking for specific and emerging talent.
- Explore career pathways in Biomedical innovation and technology.
- Discover how you can earn additional scholarships (\$450-\$600) while building real-world expertise in our accompanying program Innovate-A-thon (not required for Meet & Greet)

Who Should Apply?

Students from all disciplines who are passionate about innovation in the biomedical sector. Eligible applicants include:

- Undergraduate juniors and seniors
- Graduate students

Info for students to Apply

Submit your resume directly to steven@ed2s.org

Along with a 2 paragraph statement illustrating:

-Why innovation matters to you

- A biomedical challenge you're passionate about solving

Only excellent applications will be accepted. We encourage you to spend a little time on your submission materials - The top 2 applicant submissions will receive scholarships of \$300 and \$200!

Those top 2 applicants will each give a 5 min presentation at the event showcasing their winning submission-accelerating their visibility from among other applicants.

Scholarships will be posted to bursar accounts following Meet & Greet and upon receipt of student ID information.

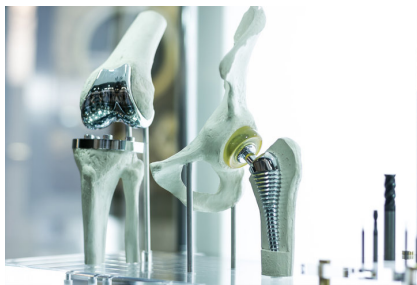

Be part of the event will put you at leading edge of new innovative careers that are shaping the future of industry!

Event Date Thursday April 17th

First session: 12-2 ET

Second Session: 3-5 ET
