

Artificial Intelligence Enabling Medical Devices

Zoom Webinar - April 10th, 2024

10AM – 12PM PDT / 1PM – 2PM EDT / 19:00 – 20:00 CEST

Join this free, insightful 1-hour webinar on the advancements of artificial intelligence in medicine. Learn how AI is aiding in the treatment, diagnoses, and research in healthcare. We will feature speakers from the FDA, CMS, as well as pioneers of AI medicine. Through this webinar, you will gain insight into patent protection strategies, patient safety and regulatory compliance, and the evolution of AI in the medical field. Register now to get exclusive information regarding the innovation and future of artificial intelligence in medicine!

Moderators

Spencer B. King III, MD
Emeritus Professor

Louis Jacques, MD
Former Director, CMS

Presentations

- **Introduction to the International Society for Cardiovascular Translational Research (ISCTR) - Educational Program on Medical Product Development** (10 min)
Nabil Dib, MD, MSc, President, ISCTR
- **Current and Future Clinical Application of Artificial Intelligence** (10 min)
James Min, MD, Founder & CEO, Cleerly, Inc.
- **FDA Perspective and Regulatory Pathway for Artificial Intelligence** (10 min)
Wenbo Li, PhD, Lead Reviewer of Medical Devices, FDA
- **CMS Perspective and Reimbursement for Artificial Intelligence** (10 min)
Joseph Hutter, MD, Center for Standards & Quality, CMS
- **IP Protection for AI-Enabled Medical Devices** (10 min)
Matthew Chun, PhD, Technology Specialist, Patent Agent, FISH

Discussion Panelists:

Nabil Dib

James Min

Wenbo Li

Joseph Hutter

Matthew Chun

Tara Sklar

Gabrielle
Gold-von Simson

Aaron Lottes
