BROUGHT TO YOU BY:

Weldon School of
Biomedical Engineering

Please join us for the Indiana Clinical and Translational Science (CTSI) Virtual Retreat hosted by Purdue University.

KEYNOTE SPEAKER

Dr. Christopher Austin

CEO Partner, Flagship Pioneering

Christopher Austin, M.D., joined Flagship Pioneering in 2021 as a CEO Partner. Chris is part of the broader Flagship senior leadership team and also serves as Chief Executive Officer of a Flagship-founded company currently in stealth and to be announced at a later date.

Chris is a trained clinician and geneticist, with more than 20 years of experience in translational research in both the public and private sectors. He joined Flagship from the National Institutes of Health (NIH) where he served as the founding Director of the National Center for Advancing Translational Sciences (NCATS).

GOALS OF RETREAT

The retreat aims to inform the audience on three broad topics:

1. Optimizing technologies and capabilities to reach successful preclinical data collection
2. Introducing innovative preclinical models and their advantages
3. Designing preclinical studies to support academic and industry partnership and FDA approval
