Birck Rm 2001 12pm – 1PM
Dr. Ruslan Yunusov
CEO of Russian Quantum Center

Most of scientific organizations in Russia still use the Soviet type management system in their work. Obviously this system is ineffective. The Russian Quantum Center (RQC) has been recently founded by using the experience of the best world quantum centers and attracted Skolkovo funding one and a half year ago. The Center has both private and public sources of funding. RQC consists of 10 scientific groups and operates in the following fields: Modern Photonics, Quantum Optics, Ultracold Atoms, Superconducting Quantum Circuits, Correlated Quantum Systems, Many-body Theory. Today RQC is planning to expend and develop applications.

Ruslan Yunusov is CEO of the Russian Quantum Center (RQC), an international research organization, and the largest resident of Skolkovo Foundation. RQC conducts scientific research in Quantum Optics and Quantum Technologies. In the past Ruslan worked as CEO in oil and gas industry. Prior to that, he had worked as an expert and analyst in investment and financial companies. He has PhD degree in physics and Master's degree in finance. Ruslan is actively engaged in the development of research activities in the field of quantum physics. He has a number of scientific publications.
