

SEMINARS IN HEARING RESEARCH

LEROY MEDRANO B.S. COHC, SLHA

Title: Cortical measures of cognitive engagement during speech processing.

Cochlear implants (CIs) are one of the most successful medical prostheses in the world. Yet, it is still unclear as to why there is substantial variability in speech recognition performance among CI users. Attempts to better understand this enigma have used behavioral tasks to examine cognitive ability in the domain of executive function in adult CI users.

THURSDAY - MARCH 23, 2023

TIME: 10:30 - 11:20 AM

LYLE 1150
