

3D3C Organ-on-a-Chip Training Course

Date: April 5 & 6, 2018

Location: 3D Cell Culture Core (3D3C) Facility, BRK2087, Birck Nanotechnology Center, Purdue University

Course Fee: \$350 per person

Who should attend:

Anybody who wants to learn about the basic knowledge and techniques of organ-on-a-chip

Activities: Lecture, Discussions, Class-room Exercises, Demonstrations, Hands-on Training

Day One	AM	Lecture (2h): Organ-on-a-chip Demonstration and Hands-On Practical – Part I (1.5h) <ul style="list-style-type: none">• Set up and run of a microfluidic system for cell culture; observation of cells on different materials used for the fabrication of 3D cell culture platforms
	PM	Exercise: i. Calculation of fluid speeds in microfluidic platforms (1h) ii. Design of a glandular system with the OChip toolbox (1h) iii. Origami for organ-on-a-chip (OOrigami) (0.5 h) Q & A (0.5h)
Day Two	AM	Q & A (0.5h) Exercise: i. Importance of culture geometry – flat, curved, angled surface (1 h) ii. Building a stroma with the OChip toolbox (1h) Visit: Micro-machining and 3D printer (1h)
	PM	Demonstration and Hands-On Practical – Part II (1.5h) <ul style="list-style-type: none">• Impact of chemicals on cells cultured in a gradient-on-a-chip microfluidic system Exercise: i. Building a liver with the OChip toolbox (1h) ii. Origami for organ-on-a-chip (OOrigami) (0.5 h) Q & A and Conclusion (1h)

Prerequisites: Purdue REM biosafety training and blood borne pathogen training; sufficient knowledge in basic cell culture techniques or 3D3C Cell Culture Basics training workshop

Class Size: Six participants (supervised by two trainers)

Contact for question and registration: Dr. Tim Kwok, Facility Manager, 3D Cell Culture Core (3D3C) Facility (kwokt@purdue.edu, 765-494-6697)

Registration deadline: March 19, 2018
