

EXOPLANETS

The Search for Atmospheric Biosignature Gases

Professor Sara Seager, MIT

Professor of Planetary Sciences – Professor of Physics – Professor of Aeronautics and Astronautics

YOUTUBE LINK: <https://youtu.be/UlwsDKYoRvc>

Thousands of exoplanets are known to orbit nearby stars.
Small rocky planets are common. Is there life on these planets?
Advanced computer simulations and next-generation telescopes search for “biosignature gases” in exoplanet atmospheres.
