

Postdoctoral Position in Biotechnology

Princeton University

A postdoctoral position in biotechnology is available in a multidisciplinary lab. Candidates will work with a group of engineers and molecular biologists to explore the applications of a new ultrasensitive and ultrafast assay platform in life science, and diagnostics, including personal health monitoring. The candidates should have a PhD degree and experiences in one of the areas: molecular biology, immunoassays development, nucleic acid assay development, and analytical chemistry.

Appointments will be for one year with renewal based on performance. Applications should be submitted to chou@princeton.edu. Please include a CV, statement of research and contact information for three references. The final candidates will be required to successfully complete a background check.

Princeton University is an equal opportunity employer and complies with applicable EEO and affirmative action regulations. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law.
