

Nanophotonics Postdoc Position at Princeton

A postdoctoral position in nanophotonics is immediately available in NanoStructure Lab at Princeton University.

Candidates will work together with a multidisciplinary team in area of nanophotonics, particularly, nanoscale subwavelength optical elements and systems, nanoplasmonics, applications in UV lasers, high efficiency LEDs and solar cells, and ultra-sensitive biosensing.

The candidates should have a demonstrated successful research track record in conventional optical devices and measurements or nanophotonics, and a PhD degree in electrical engineering, physics, materials, or chemistry.

Candidates should email her/his resume to Prof. Stephen Chou, chou@princeton.edu.

Princeton University is an equal opportunity employer and complies with applicable EEO and affirmative action regulations. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law.
