Ulyssa Hester
Masters Student
Ecological Sciences & Engineering
Interdisciplinary Graduate Program

Dr. Colleen Gabauer
Managing Director of
Interdisciplinary
Graduate Programs

Dr. Mahsa Fardisi
Postdoctoral Research Associate
Department of Entomology

Please join us as we define gender biases in STEM, explore what they look and feel like, try to understand why these biases are so prevalent in STEM and the negative impacts they have on career trajectories. We will discuss what can be done to address them, hear experiences from women, as well as answer questions from the audience regarding gender biases in STEM.

What is Mentoring@Purdue?

M@P is a mentoring program designed for women and minority graduate students in the College of Agriculture at Purdue University. M@P aims to improve the quality of graduate education through fostering mentoring relationships between graduate students and faculty or staff members in the Agriculture and Life Sciences. Mentoring has played a crucial role in the success of many individuals, especially those that are generally underserved. The M@P program will help students grow professionally, academically, and personally to become successful individuals in their chosen area of study.
