

International Summer School: **Printed Hybrid Photonic & Electronic Structures: Enabling Technology Needs of Today & Tomorrow**

- **When?** July 22 to August 05, 2022
- **Where?** Karlsruhe, Germany
- **Who?** International MSc & advanced BSc students from Physics, Electrical/ Mechanical Engineering, Material Science, or related fields
- **What to expect?** Expand your knowledge in nanophotonic materials, metamaterials and printed optoelectronics, interact with experts, get insights into KIT, get to know German industry, train your soft skills & have fun with other international students
- **Cooperation of:**
- **Costs:** 600 € (incl. accommodation, meals & participation in program; reimbursement of travel costs via DAAD)
- **Apply by April 30th, 2022**
