

Key message

Apply now for the **International Summer School “Printed Hybrid Photonic & Electronic Structures: Enabling Technology Needs of Today & Tomorrow”** from July 22 to August 05, 2022 at Karlsruhe Institute of Technology, Germany!

Are you advanced Bachelor or Master student of physics, electrical/mechanical engineering or material science? Would you like to expand your knowledge on nanophotonic materials, metamaterials and printed optoelectronics like perovskite solar cells? The International Summer School is a great opportunity to learn more about this fascinating research field and get to know leading researchers and international students.

Please follow this [link](#) for further information. Applications are possible **until April 30, 2022**.

The Summer School is organized by Karlsruhe Institute of Technology. The cooperation partners are the Karlsruhe School of Optics and Photonics, the Cluster of Excellence 3D Matter Made to Order and the Ensemble3 Centre of Excellence.
