

In Honor of Dr. Patricia Galloway

It is with great sadness that we announce the passing of Pegasus-Global Holdings' Co-Founder and Co-Chair Dr. Patricia Galloway, who passed away unexpectedly on Thursday, September 26, in the company of family and beloved friends.

Dr. Galloway leaves behind a monumental legacy as a renowned leader in civil engineering, gigaproject construction, and dispute resolution.

Her extensive experience as CEO for The Nielsen-Wurster Group and Pegasus-Global Holdings included large and complex projects throughout the world such as the Panama Canal Expansion, London's Crossrail Project, Vogtle Nuclear Units 1, 2, 3 & 4, Kuala Lumpur International Airport and many, many more.

Dr. Galloway also served as an arbitrator since 1987 in many U.S. domestic and international arbitrations and dispute resolutions. She was recognized by her peers as a Fellow of the College of Commercial Arbitrators, becoming the first non-lawyer to be elected to the College, a Fellow and a Chartered Arbitrator of the UK Chartered Institute of Arbitrators and a member of the Distinguished Academy of Neutrals.

Throughout her career, Dr. Galloway lent her skills and expertise to a broad portfolio of corporate, community and government boards. Highlights include serving as the first woman President of the American Society of Civil Engineers in 2004 and serving as a member of the U.S. National Science Board having been appointed by U.S. President Bush for a six-year term with two of those years as its Vice Chair. She also served on boards for the SCANA Corporation, Bergmann and Associates, the American Arbitration Association, the Central Washington University Foundation Board of Trustees, the Pacific Science Center, and the Pan American Academy of Engineering.

At the time of her passing, Dr. Galloway was serving on the boards of Pegasus-Global Holdings, Stantec, Granite Construction and Life Support (a local not-for-profit).

Dr. Galloway was a prolific writer and world-renowned speaker having authored over 130 papers, approximately 30 peer reviewed journal articles and nearly 200 public speaking engagements including over 45 keynote addresses. She served as a guest lecturer at multiple universities across the globe from Australia to China to Europe and here in the United States.

Dr. Galloway's achievements were highlighted by her TEDx talk on "Are Engineers Human?", and on a variety of media outlets such as Sky News Australia TV, ADR Perspectives, PM Network, Time magazine, CNN Lou Dobbs; Discovery Channel; Engineering News Record; and Federal Technology Watch. She was also a blog writer for Engineering News Record discussing current trends, challenges, and hot topics in the construction industry.

Her unending curiosity and love of adventure led her to all seven continents. From horse-riding in Australia, to deep sea fishing in Alaska, safaris in Africa and expeditions on the Galapagos Island, she was always planning her next trip. If she wasn't travelling the world, she was entertaining friends and family at Unionville Ranch or relaxing with Jim at her Montana cabin.

Our thoughts are with her husband Jim, their children Megan and Travis, her late husband Kris Niensens' daughters Chri, Tanya, Tara and Lia, and the many friends and colleagues whom she held dear.

Our founder, mentor and friend will be sorely missed.
