

PURDUE CIVIL AND CONSTRUCTION ENGINEERING

SEMINAR SERIES:

PANEL ON: ARCHITECTURAL DESIGN TRENDS AND SDGs

Architectural design is at the forefront of addressing global sustainability challenges and aligning with the United Nations Sustainable Development Goals (SDGs). This panel highlights the pioneering research of CIB's Working Commissions (WCs) and Task Groups (TGs), focusing on architectural design and management (W096) and creating inclusive built environments (TG125).

The discussions will investigate emerging trends in sustainable design, showcasing innovations in materials, adaptive reuse, and performance-driven architecture. We will explore how inclusive design principles ensure accessibility and equity, making built environments more resilient and adaptable to diverse user needs.
