# ALASKA DOT BRIDGE SECTION

## BRIDGE ENGINEERING ASSISTANT POSITION IN JUNEAU, ALASKA

### Why Juneau?

Juneau isn't just a place to work — it's a place to live and thrive. Surrounded by mountains, glaciers, and ocean, it offers world-class hiking, boating, kayaking, and fishing. Imagine ending your day with a glacier hike, an evening paddle, or even catching the northern lights.

### WHAT YOU'LL DO

- Work on real projects from day one — from structural analysis and calculations to creating plans, specifications, and cost estimates
- Split your time between office and field — including federally mandated inspections that take you across Alaska, sometimes to remote communities only accessible by plane or ferry.
- Grow professionally — with mentoring from licensed engineers, PE exam support, and opportunities to attend and present at national bridge conferences.
- Engage in innovation and research — over three-quarters of our office are licensed drone pilots, and we encourage all staff to become certified. You may also have opportunities to serve as subject matter experts on research panels, contribute to sponsored studies, attend national bridge conferences, and participate in frequent webinars and in-house training.

### WHAT WE OFFER

- 37.5-hour workweek with paid overtime
- Competitive salary with automatic raises
- Generous retirement benefits, including a 13% automatic salary match
- 12 paid state holidays + 15 days of annual leave starting year one
- Strong opportunities for career advancement
- Essential positions – you may see a red banner about the Governor's hiring freeze on the Workplace Alaska website, but bridge engineering roles are mission critical, federally mandated, and fully authorized for hire.

### WHAT THIS ROLE IS LIKE
