

# Purdue's Chilled Water Enhancement Projects

**Guest Speaker:** Daniel P. Bazzini,  
PE, Project Manager

**Curious what trenchless construction really looks like in the field?**

Come learn how Midwest Mole tackled major tunneling work for Purdue's chilled water system expansion, including what happens when site conditions don't go as planned. This session will break down how the team handled unexpected geology, protected safety on an active campus, and kept the project moving forward using an Akkerman 840 TBM. Expect real project insights, lessons learned, and practical takeaways for students and professionals interested in construction and infrastructure.

## SEE YOU THERE

-  Wednesday, March 11, 2026
-  5:45 to 6:45 pm
-  PGSC Joint Conference Room 105 A & B

Food Provided!
