Re: Annual Renewal of Integrated Safety Plan Certification

The Integrated Safety Plan (ISP), administered by Radiological and Environmental Management (REM), ensures Purdue University continues to maintain a safe and compliant environment for students, staff, and visitors. REM recommends one of your areas continues to be recognized for implementation of their ISP. As Senior Director of Environmental Health and Public Safety, I approve the School of Chemical Engineering for ISP recertification. This certification indemnifies the School of Chemical Engineering from fiscal responsibility for regulatory fines levied upon the University. In order to maintain certification, you will need to ensure the following:

- Regular meetings of the safety committee
- ISP safety self-audits by each area
- Timely communication of safety issues throughout the department
- REM annual audit and recommendation for ISP certification renewal

Congratulations on your certification! Thank you for your continuing support of Environmental Health and Safety at Purdue University. If you have any questions, please contact Jim Schweitzer, Director, REM at 4-2350, or jfschwei@purdue.edu.

Carol A. Shelby
Senior Director
Environmental Health and Public Safety
