

Hazards in the Lab are Present, Persistent, and Powerful! Is Your Safety Culture?

ChESS is a **student led** seminar series with the goal of **improving** the safety culture in the School of Chemical Engineering through **case studies** and **panel discussions**.

WITH

Mr. Wesley White From  **EVONIK**
POWER TO CREATE

Join us for a conversation about keeping our lab safety culture strong and improving. *Wesley White*, the lead chemist running the Reactive Hazard Testing lab at Evonik Tippecanoe Labs, will be sharing observations about lab safety in the chemical industry. We'll compare and contrast safety culture challenges between academic and industrial labs. Through conversation and a little bit of brainstorming, we will work together to identify what is working well in Purdue research labs and areas for possible improvement. After all, we all want everyone going home safely, after every class or lab day, every day.

Limited seating available

Register by 12 PM on
Wednesday, Oct 16th

<https://tinyurl.com/46u5prz7>

Pizza provided &
the ChESS session
can be counted as
one graduate
seminar credit

❖ Food is provided before
the lecture in 3059 from
12:00-12:30 p.m.

Thursday, Oct 17th
12:30 – 1:30 PM
Location : FRNY 3059
