MSTEM500 2016 Max Capacity

Make sure you register early for the 2017 MSTEM500. Last year we were at capacity by Mid-April and it will not take that long for the 2017 registration.

We ask that each student bring a sack lunch and a couple bottles of spring water to the event. This keeps the costs down and allows us to bring more students to such a cool and relevant venue.

This year on High School Day, we hope that many of the High School Students and teachers will stay a bit longer and watch the second annual High School evGrandPrix. It should be exciting and we encourage you to take a look and see what your students can be competing in next year for the 2018 event.

MSTEM3.org and then click EVENTS No cost to the school. bus passes provided.
