

Team India - 10/20

What has happened over the week?

- > The medical team has reviewed other projects and have come up with a final list that they will be selecting from.

Things to accomplish by the end of the day:

- > We will have Mr. Benjamin Borgmann coming in tomorrow and he will be running a session for the entire lab.
- > To make things smooth, we will be starting with PIGS for all three teams at 8.30am and then move onto discussions after which Mr. Ben will review the progress and conduct his session.

Announcements :

- > We are expecting a guest session next week as well, so make sure you have enough out of lab meetings to make sure your teams move forward with your projects
- > We will have our Mid-Semester progress review that will be conducted by the TA.
- > Let me know if you have any suggestions about the changes in EPICS for this semester. The EPICS administration brought this up in a recent project manager's meeting discussion and are looking for any kind of suggestions on how the current process could be improved.
