

Team India - 09/15

Recap:

So the medical team has gotten a new problem statement, and have decided to go forward with that. It will be a fetal monitoring belt, and the specifications are still being discussed.

What has happened over the week?

- > RuTag will be communicating with IIT via email since IIT is unavailable for calls this week.
- > Medical team discussed new problem statement
- > The website has been updated.
- > The teams are communicating with their project partners on their own and are 'settling in.'
- > If you think there is any issue with your partners/internally, just let me know and I will look into it.

Things to accomplish by the end of the day:

- > We will have team discussions till 9:00am, and start PIGS after that. This is because we have our Tractor team calling VIT at 8.30am.
- > Just make sure that your notebooks are done

Announcements :

- > Semester time line due tomorrow. Make sure it's on your PIGS slides.
- > We will be using the semester timeline in our PIGs from this point onwards. So just make sure you put that up in your PIGS from here onwards.
- > Please make sure that there is a copy of your notebook on sharepoint if your sync doesn't work

Important Notice

Following the email I sent you guys today, I just want to reiterate my statement. We will be using the same link I sent you all today, for PIGs throughout the rest of the semester. Make sure you bookmark it, or you can always look it up from your email.

The plan is to download a copy of the slides just after the PIGs session, and then delete them from Google Slides. This way we will have a copy of the presentation, along with an empty template. I think this will save all of us a lot of time and you can just make your PIGs slides at your own will. If you think you have any suggestions that might make any of this process easier, just let me know and we will be on it!

SEMESTER TIMELINE DUE TOMORROW (09/15)

2 More Weeks till DESIGN DOCUMENT submission - Design Leads
