

Team India - 09/08

Recap:

All 3 teams have communicated with their respective partners. Semester plans due next week, and teams are working on their plans for the upcoming semester.

What has happened over the week?

- > The RuTag team has been able to contact the Art League and get useful information for their team. They have also made their semester plan.
- >The Tractor team have met with a few people from Civil Eng and the Ag department
- > We have a new Webmaster : Karthick Shankar
- >The VIT medical team has restructured and we have two Co-Design Leads : Prerena Prahlad and Karthick Shankar.

Things to accomplish by the end of the day:

- > We will start with PIGS, and the Medical Team has a call scheduled with vit at 9:00am in a different room.
- > Team discussions.
- > PHOTOS. We are planning to take a group picture outside the Armstrong atrium .

Announcements :

- > Notebook Review next week. Please make sure you are working on your notebooks
- > Please take a look at the previous semesters' work done, and try to get a general understanding of the semester structure, if its still unclear.

Important Notice

There has been some confusion over internal and external team communication and I will try to explain it briefly. (I also got this clarified over this week so I'm sorry if I said otherwise at anytime last week)

Primarily, every team is supposed to, and encouraged to communicate with your partners overseas. Remember that you have ALL the freedom to do so. There is no permission needed. It's your project. It's your team.

Only if you want to talk to them DURING LAB TIME, you will need to INFORM me/our TA by Wednesday 6pm latest, so we can look into arranging a seperate meeting room. You are still required to handle the logistics and talk to them before hand so they are ready for the call. The advisors/TA will not coordinate the calls with the teams. You have to do it before Friday, and both the teams should be prepared. Also please keep in mind that the Indian teams will be on IST and if they want to have a call as early as 8.40am EST, we should try to accomodate it and move PIGS discussion to a later time.
