PACIFIC EARTHQUAKE ENGINEERING RESEARCH CENTER

Preliminary Reconnaissance Webcast
about the
Haiti Earthquake

TUESDAY January 26, 2010
5:45 PM – 8:00 PM
CIVL 1252

presentation by:
EDUARDO FIERRO, P.E.
BFP Engineers, Inc.

FOOD & DRINK WILL BE PROVIDED

On January 12, 2010, a magnitude 7.0 earthquake in Haiti caused extreme destruction to Haiti's infrastructure, economy and society. Eduardo Fierro, president of BFP Engineers, Inc. based in Berkeley CA, has just returned from a week of post-earthquake reconnaissance work investigating the damage in Haiti that was partially funded by PEER.

As the first earthquake engineer from the United States to do earthquake reconnaissance in Haiti, he will be presenting, for the first time, his personal account of the earthquake including photos and video that have never been seen. He will also share new information about the current situation in Haiti and will highlight the damage caused to the built environment from an engineering perspective.

This seminar was jointly organized and hosted by:
Pacific Earthquake Engineering Research Center & UC Berkeley Department of Civil Engineering

Webcast at Purdue University is hosted by:
Earthquake Engineering Research Institute (EERI), Purdue Student Chapter
