

ENGINEERING & ANTHROPOLOGY

Workshop Series

Next Workshop

Community Needs Assessment

Tuesday, April 9, 5:30-8:30pm, HICKS G980D

The third workshop in this series will address:

- Methods and approaches for uncovering community needs of different types
- Ways to analyze specific needs to better understand where and how they might be addressed
- Deciding how to design or re-design your project to have maximum impact on that need.

The goal of this workshop series is to promote synergy between students from anthropology and engineering to discuss important and relevant topics related to international development projects. Workshops will be led by Riall Nolan, Professor of Anthropology, with support from students in engineering and anthropology.
