- Global Seminar Series -

NASA Technologies Benefiting the Developing World

Douglas Comstock is the Director of NASA's Innovative Partnerships Program (IPP).

IPP provides leveraged technology for NASA's mission directorates, programs and projects through investments, and technology partnerships with industry, academia, government agencies and national laboratories.

He will discuss technologies developed by NASA in the areas of:

- disaster relief
- environmental monitoring & management
- clean drinking water
- agriculture and food distribution

FRIDAY, APRIL 30th, 2010 at 10:00am in CIVIL 2117
