

I²D Exposition Keynote Panel Discussion

Innovation and Collaboration for Inclusive Development

Thursday, April 2

4:00 - 5:30 pm | ARMS 1109

Sara Enright

Associate Director, BSR
(Business for Social Responsibility)
Sara applies her management consulting and international development experience to BSR's collaboration and inclusive economy work. She will share her perspective on the importance of corporate engagement and socially conscious business practices for large scale impact.

Jacqueline Ogega

Director Gender Equality and Social Inclusion,
World Vision
Jackie will reflect on World Vision's Gender Equality and Social Inclusion Approach and Theory of Change to discuss her perspective on the importance of intersectionality and inclusion in development.

Amos Winter

Associate Professor, MIT
Amos's research focuses on marrying mechanical design theory and user-centered product design to create simple, elegant technological solutions for low resource settings. He will discuss the importance on designing ethical and collaborative tech solutions for inclusive social impact.

Michael Woolcock

Lead Social Scientist, Development Research Group, World Bank, and Adjunct Lecturer in Public Policy, Harvard Kennedy School.
Michael will focus on strategies for assessing complex social interventions and implementing adaptive approaches. He will also consider the role of social capital, trust and participatory approaches in designing interventions that respond to concerns that poor communities themselves have nominated and prioritized.

Pallavi Gupta

Asst. Director of Programs,
Shah Family Global Innovation Lab,
GEP², Purdue (moderator)
