To Whom It May Concern,

I am writing this letter in support of Mr. Victor Fabre Figueiredo's application for a travel grant to attend the IEEE International Workshop on Multimedia Signal Processing (MMSP) 2024. Victor is a PhD student of mine in the Electrical Engineering program at Universidade de Brasília, and he has co-authored the paper titled "Embedded Bit-Stream Region-of-Interest Coding of Point Cloud Attributes," which has been accepted for presentation at MMSP 2024.

Victor has demonstrated remarkable dedication to his research in multimedia signal processing. He has been actively engaged in cutting-edge research, contributing to the academic community with high-quality publications and significant insights into his field. His accepted paper at MMSP 2024 is a testament to his ability to conduct innovative research and share valuable findings with the multimedia signal processing community.

Attending MMSP 2024 would provide Victor with an excellent opportunity to network with experts, gain insights into the latest advancements in multimedia signal processing, and discuss potential collaborations. These experiences would be immensely beneficial for his academic and professional development, as well as for our research group.

As a student from a developing country, financial support for attending conferences is hard to come, which may hinder his ability to attend the conference without support. A travel grant would enable him to fully participate in the conference, present his work, and engage with the community.

Given his genuine need for financial support and the potential benefits of attending the conference, I highly recommend Victor Fabre Figueiredo for the MMSP 2024 travel grant.

Thank you for considering his application.

Sincerely,

Prof. Ricardo De Queiroz  
Universidade de Brasília
