

To Whom It May Concern,

I am writing this letter to support Gaurav Prasad's application for the MMSP (Multimedia Signal Processing) 2024 Travel Grant. Gaurav is a dedicated and driven student, excelling in his studies and research pursuits. As one of the top-performing students I have encountered, Gaurav's recent work has consistently demonstrated his commitment to advancing the field of machine learning and signal processing. Gaurav has been actively involved in research projects that have led to significant findings, particularly in deep learning and its applications in image and signal processing. His work has already garnered attention within the academic community, and his contributions to the ongoing research have been invaluable.

The paper he intends to present at MMSP 2024 is a testament to his hard work and innovative approach. In addition to his research, Gaurav has maintained an impressive academic record, consistently achieving high grades across all his courses. His ability to balance rigorous coursework with research activities is commendable and speaks to his exceptional time management skills and work ethic. Attending MMSP 2024 would be a crucial opportunity for Gaurav to present his research to a wider audience, gain feedback from industry experts, and further his academic journey. This experience would also enable him to bring new insights back to his peers and contribute to the academic community at his institution.

Unfortunately, as a full-time student, Gaurav faces financial constraints that make it challenging to cover the travel expenses (\$1960) associated with attending the conference. The MMSP 2024 Travel Grant would significantly alleviate this burden and allow him to participate in this important academic event. I am confident that Gaurav will make the most of this opportunity, both as a presenter and representative of our institution (University of Waterloo). His participation in MMSP 2024 would not only benefit his academic development but also inspire and motivate his peers.

Thank you for considering Gaurav Prasad's application. If you need more information, please do not hesitate to contact me.

Zhou Wang, PhD, PEng, FIEEE, FCAE, FRSC
