## **FROM MARS TO MAIN STREET: How KR Sridhar's powerful journey is revolutionizing the Energy Industry**

Recognized by *Fortune Magazine* as "one of the top five futurists inventing tomorrow, today," we are honored to welcome KR Sridhar, Ph.D. for an intimate discussion to learn how his journey--from India, to his graduate studies in the United States, to leading the Space Technologies Laboratory (STL) at the University of Arizona, and ultimately to founding Bloom Energy, a leading energy company--has shaped his perspectives about life, purpose and innovation. KR Sridhar has continuously spearheaded novel solutions to vexing problems throughout his

career, from creating technologies to enable a sustainable community on Mars to perfecting a fuel cell capable of producing clean, reliable and affordable electricity from air and fuel for everyone here on Earth.

During this seminar, KR Sridhar will share some of the challenges--personally, professionally and technically--he has encountered throughout his life and career, the lessons he has learned, and how they have shaped his approach to leadership and business.
